Aim: Turn on the LED on for a second, then off the next second repeatedly.

Hardware Required:

- ① Arduino Board
- ② LED
- ③ USB cable
- ④ wire.

CODE:

```
Void setup()
```

```
{  
    pin mode (13, OUTPUT);  
}
```

```
Void loop()
```

```
{  
    digital write(13, HIGH);  
    delay(1000);  
    digital write(13, LOW);  
    delay(1000);  
}
```
